

CHILDREN'S DISEASES №2

1. Exploring the subject of neonatology. The concepts of periods.
2. The concepts of periods of fetal development, prenatal, neonatal period.
3. Risk groups among newborns.
4. A full-term newborn baby. The concept of the morphological and functional maturation of the newborn.
5. Anatomical - physiological characteristics of a newborn.
6. Anatomical and physiological features of a full-term newborn.
7. The concept of perinatal and neonatal periods.
8. Transitory conditions of newborns. Concept.
9. Transitory conditions of newborns: uric acid crystals.
10. Transitory conditions of newborns: physiologic jaundice.
11. Transitory conditions of newborns: physiologic jaundice. Outcome.
12. Transitory conditions of newborns: physiologic mastopathy.
13. Transitory conditions of newborns: physiologic mastopathy. Complications.
14. Transitory conditions of newborns: desquamative vulvovaginitis.
15. Transitory conditions of newborns: physiological weight loss.
16. Transitory conditions of newborns: dysbacteriosis.
17. Transitory conditions of newborns: physiologic oliguria.
18. Transitory conditions of newborns: toxic neonatal erythema.
19. Transitory conditions of newborns: sweat rash (miliaria).
20. Transitory conditions of newborns: Hydrocele.
21. Transitory conditions of newborns: Passage of meconium.
22. Transitory conditions of newborns: Desquamation of neonate's skin.
23. Transitory conditions of newborns: sweat rash (types).
24. Classification of newborns by birth weight.
25. Chronic hypoxia of the fetus. Causes.
26. Chronic hypoxia of the fetus. Diagnostics.
27. Birth cardio - respiratory depression.
28. Acute asphyxia of the newborn Classification.
29. Acute asphyxia of the newborn Classification. Assessment of severity.
30. Acute asphyxia of newborn. Apgar score.
31. Acute asphyxia of newborn. Intensive therapy of acute period.
32. Clinical manifestations of moderate asphyxia. The principles of treatment.
33. Clinical manifestations of severe asphyxia.
34. Clinical manifestations of severe asphyxia. Treatment.
35. Acute asphyxia of newborn. Resuscitation step A.
36. Acute asphyxia of newborn. Resuscitation step B.

37. Acute asphyxia of newborn. Resuscitation step C.
38. Acute asphyxia of newborn. Resuscitation step D.
39. Chronic intrauterine fetal hypoxia. Causes. Outcomes.
40. The high risk factors of acute asphyxia development.
41. Clinical manifestation of birth asphyxia.
42. Basic algorithm for newborn resuscitation.
43. Acute asphyxia of newborn. Drugs administration.
44. Features of clinical course of acute hypoxia and intracranial birth injury in preterm infants.
45. Features of clinical course of acute hypoxia and intracranial birth injury in preterm infants. The principles of treatment.
46. Birth injury. Causes.
47. Predisposing factors to the development of birth trauma.
48. Birth injury. Clinical forms. Complications and outcomes.
49. Birth injury. Causes. Complications.
50. Birth injury. Cephalohematoma. Clinical manifestations.
51. Birth injury. Cephalohematoma. Differential diagnosis.
52. Birth injury. Erb palsy.
53. Birth injury. Klumpke palsy.
54. Birth injury. Intracranial birth injury.
55. Birth trauma. Epidural hemorrhages.
56. Birth trauma. Epidural hemorrhages. Outcome.
57. Birth trauma. Subdural hemorrhages. Clinical manifestations.
58. Birth trauma. Intraventricular hemorrhages.
59. Intracranial hemorrhages. Treatment.
60. Birth injury to the central nervous system. Clinical manifestations.
61. Intracranial birth injury. Classification,
62. Intracranial birth injury. Clinical manifestation.
63. Intracranial birth injury. Diagnostics.
64. Soft tissue birth injury. Clinical manifestation.
65. Soft tissue birth injury. Treatment.
66. Birth trauma. Reanimation and intensive care.
67. Birth trauma of the brain. Classification.
68. Intracranial birth injury. Forecast.
69. Neonatal sepsis. Clinical forms.
70. Neonatal sepsis. Diagnostics.
71. Neonatal sepsis. Etiology. Classification.
72. Neonatal sepsis. Clinical manifestations. Blood picture.
73. Neonatal sepsis. Blood picture.

74. Neonatal sepsis. The role of bacteriological and immunological techniques in the diagnosis of sepsis.
75. Neonatal sepsis. Early onset.
76. Neonatal sepsis. Late onset.
77. Intrauterine infection. The main ways of penetration of the pathogen to the fetus.
78. Intrauterine infection. Concept. Etiology.
79. Congenital infection. Concept. Etiology.
80. Spectrum of antenatal pathology with intrauterine infection.
81. Intrauterine infection. Outcome.
82. Prenatal diagnosis of intrauterine infections.
83. Diagnosis of Intrauterine infections in pregnant.
84. Diagnosis of Intrauterine infections in newborns.
85. Clinical evaluations of newborn's condition with intrauterine infections.
86. Intrauterine infections. The most typical symptoms of "TORCH- syndrome".
87. Intrauterine infection. Listeriosis. Diagnostics.
88. Intrauterine infection. Listeriosis. Clinical manifestations.
89. Intrauterine infection. Listeriosis. Treatment.
90. Intrauterine infection. Listeriosis. Outcome.
91. Intrauterine infection. Usual clinical presentations of listeriosis in newborns
92. Intrauterine infection. TORCH- complex.
93. Intrauterine infection. The main ways of penetration of the pathogen to the fetus.
94. Intrauterine infection (CMV). Clinical manifestations.
95. Intrauterine infection (CMV). Investigations.
96. Intrauterine infection (CMV). Differential diagnosis.
97. Intrauterine infection (CMV). Treatment.
98. Intrauterine infection (CMV). Diagnostics.
99. Intrauterine infections (rubella). Clinical manifestations.
100. Intrauterine infections (rubella). Diagnosis.
101. Intrauterine infection. Rubella. Risk of fetal infection.
102. Intrauterine infection. Rubella. Outcome.
103. Intrauterine infection. Rubella. Fetal complications.
104. Intrauterine infection. Congenital rubella syndrome.
105. Intrauterine infection (herpes). Clinical manifestations.
106. Intrauterine infection (herpes). Diagnostics. Treatment.
107. Intrauterine infection (herpes). Treatment.
108. Intrauterine infection. Usual clinical presentations of herpes in newborns.
109. Intrauterine infection. Herpes. Outcome.

110. Intrauterine infection. Toxoplasmosis. Clinical manifestations.
111. Intrauterine infection. Toxoplasmosis. Diagnostics.
112. Intrauterine infection. Toxoplasmosis. Treatment.
113. Intrauterine infection. Toxoplasmosis. Risk of fetal infection.
114. Intrauterine infection. Toxoplasmosis. Outcome.
115. Infectious diseases of the skin and subcutaneous tissue in the newborn: Vesiculopustelosis. Etiology. Clinical manifestations.
116. Infectious diseases of the skin and subcutaneous tissue in the newborn: pemphigus of the newborns.
117. Infectious diseases of umbilical wound and umbilical cord: omphalitis. Clinical manifestations.
118. Infectious diseases of umbilical wound and umbilical cord: omphalitis. Clinical forms. Diagnostics.
119. Infectious diseases of umbilical wound and umbilical cord: omphalitis. Treatment.
120. Diseases of the skin and subcutaneous tissue in newborn: Exfoliative dermatitis of Ritter.
121. Diseases of the skin and subcutaneous tissue in newborn: Exfoliative dermatitis of Ritter. Treatment.
122. Diseases of the skin and subcutaneous tissue in newborn: Pseudofurunculosis.
123. Diseases of the skin and subcutaneous tissue in newborn: Necrotic phlegmon.
124. Diseases of the skin and subcutaneous tissue in newborn: Necrotic phlegmon. Treatment.
125. Diseases of the skin and subcutaneous tissue in newborn: Necrotic phlegmon. Diagnostics.
126. Inflammatory diseases of the skin: mastitis of newborn.
127. Gangrene of the umbilical cord in newborn. Clinical manifestations.
128. Gangrene of the umbilical cord in newborn. Diagnostics. Treatment
129. A premature newborn baby. Concept. Causes.
130. Anatomical and physiological features of preterm infant.
131. The classification of preterm infants.
132. A premature newborn baby. Factors contributing to increased morbidity and premature mortality.
133. Hemorrhagic vasculitis. The principles of treatment. Outcomes
134. Hemorrhagic vasculitis. Course of the disease.
135. Hemorrhagic vasculitis. Differential diagnosis.
136. Hemorrhagic vasculitis. Differential diagnosis and treatment.
137. Hemorrhagic vasculitis. Differential diagnosis. Outcomes.

138. Hemorrhagic vasculitis. Outcomes. Treatment.
139. Hemorrhagic vasculitis. Classification.
140. Hemorrhagic vasculitis. Clinic. Diagnostics.
141. Hemolytic anemia. Classification. Clinic.
142. Acquired hemolytic anemia. Clinic.
143. Acquired hemolytic anemia. Diagnostics.
144. Acquired hemolytic anemia. Classification.
145. Acquired hemolytic anemia. Treatment.
146. Acquired hemolytic anemia. Differential diagnosis.
147. Hereditary spherocytosis as genetically defective red blood cell membrane.
Clinical manifestations.
148. Hemolytic anemia. Classification.
149. Hereditary spherocytosis. Clinical manifestations.
150. Hereditary spherocytosis. Diagnosis.
151. Hereditary spherocytosis. Differential diagnosis.
152. Hereditary spherocytosis. The course and outcome.
153. Hereditary spherocytosis. Treatment.
154. Hereditary spherocytosis. Diagnosis. Indications and timing of splenectomy.
155. Hereditary spherocytosis. Differential diagnosis.
156. Thalassemia. Classification.
157. Thalassemia. Clinical manifestations.
158. Cooley disease. Clinical manifestation.
159. Cooley disease. Diagnostics.
160. Cooley disease. Treatment.
161. Glucose-6 –phosphatdehydrogenes deficiency. Etiology.
162. Glucose-6 –phosphatdehydrogenes deficiency. Clinical manifestation.
163. Glucose-6 –phosphatdehydrogenes deficiency. Blood picture.
164. Glucose-6 –phosphatdehydrogenes deficiency. Treatment.
165. Glucose-6 –phosphatdehydrogenes deficiency. Differential diagnosis.
166. Hemolytic anemia. Classification. Types of hemolysis.
167. Hemolytic anemia. Laboratory diagnosis of hemolytic anemia.
168. Hemophilia. Diagnosis.
169. Hemophilia. Classification.
170. Hemophilia. Treatment.
171. Hemophilia. Clinical manifestation.
172. Hemophilia. Differential diagnosis.
173. Thrombocytopenic Purpura. Clinical manifestation.
174. Thrombocytopenic Purpura Diagnostics.
175. Thrombocytopenic Purpura. Complications.

176. Thrombocytopenic Purpura. Etiology.
177. Thrombocytopenic Purpura. Blood picture.
178. Thrombocytopenic Purpura. Diagnostics.
179. Thrombocytopenic Purpura. Classification.
180. Thrombocytopenic Purpura. Indications for splenectomy and glucocorticoids.
181. Thrombocytopenic Purpura. Differential diagnosis.
182. Acute leukemia. Classification.
183. Acute leukemia. Etiology.
184. Acute leukemia. Differential diagnosis.
185. Acute leukemia. Outcomes.
186. Acute myeloid leukemia. Blood picture.
187. Acute myeloid leukemia. Clinical manifestation.
188. Acute myeloid leukemia. Myelogram.
189. Acute myeloid leukemia. Diagnostics.
190. Acute myeloid leukemia. Modern methods of treatment.
191. Acute myeloid leukemia. Clinic.
192. Acute myeloid leukemia. Differential diagnosis.
193. Acute myeloid leukemia. Features hematological picture.
194. Acute lymphoblastic leukemia. Clinical manifestation.
195. Acute lymphoblastic leukemia. Myelogram.
196. Acute lymphoblastic leukemia.
197. Acute lymphoblastic leukemia. Features hematological picture.
198. Acute lymphoblastic leukemia. Differential diagnosis.
199. Acute lymphoblastic leukemia. Diagnostics.
200. Acute lymphoblastic leukemia. Treatment.
